Appl. No. : 10/618,957 Filed : July 14, 2003

## LISTING OF THE CLAIMS

## Please amend the claims as follows.

- 1-7 (Canceled)
- 8 (Previously Presented): A transparent surface protective film for transparent conductive substrates protecting a surface opposite to a side of a conductive thin film of the transparent conductive substrates or a surface on a side of the conductive thin film, comprising:
  - a transparent base material film,
  - a transparent adhesive layer formed on one side of the base material film, and
  - a transparent antistatic layer formed on the other side of the base material film,
  - said transparent surface protective film being configured to maintain transparency even after one-hour heat treatment at 150°C,
  - wherein the antistatic layer comprises polymers having pyrrolidinium rings in main chains thereof.
  - 9 (Canceled)
- 10 (Previously Presented): The transparent surface protective film of Claim 8, wherein the thickness of said adhesive layer is about 3-100  $\mu m$ .
- 11 (Previously Presented): The transparent surface protective film of Claim 8, wherein the thickness of said adhesive layer is about 5-40 µm.
- 12 (Previously Presented): The transparent surface protective film of Claim 8, wherein said base material film comprises polyethylene terephthalates and/or polyethylene naphthalates.
- 13 (Withdrawn): A transparent conductive substrate comprising a substrate and the surface protective film of Claim 8 attached on a surface of the substrate.
